### The 2014/15 Budget Executive Summary

This report presents the budget for Fiscal Year 2014/15

The timeline for adoption of the final budget was as follows:

May 27, 2014 General review of tentative budget

June 9, 2014 Resolution authorizing public display of the budget and setting date for public hearing

July 1, 2014 Tentative budget is placed on public display and notification of a public hearing is placed in the newspaper. (Illinois School Code requires the budget document be placed on display for 30 days prior to the public hearing or adoption).

August 11, 2014 Review of any changes, public hearing, and final budget adoption

As this process spans several months, budget manager review, grant revisions, audit accruals, and variance analysis typically result in adjustments between the tentative and the final adopted budget.

This budget document attempts to provide information which will give Board members a comprehensive knowledge of the sources and uses of District funds.

#### **General Budget Parameters**

On January 13, 2014, the Board of Education authorized the Superintendent to move forward with developing a budget based on the following general parameters.

- · In accordance with the Board approved Fund Balance Policy;
- Allocate costs associated with implementing the District's Strategic Plan;
- Project staffing needs based on enrollment projections, proposed staffing plan and frameworks;
- Allocate salary costs based on Board authorized percentage increases, the negoatiated agreements;
- · Allocate insurance benefit costs based on projections and plans as identified through the Insurance Committee process;
- · Allocate facilities, equipment and capital improvement project costs adopted by the Board of Education;
- · Allocate funds to support the District technology plan;
- · Allocate funds to support new District initiatives;
- · Restructure budgets as deemed necessary to meet financial goals;
- Allocate in alignment with other assumptions and strategies as set forth in the Long-Term Financial Plan representative of the Board's goal to maintain its State Financial Profile Recognition status.

#### **Budget Highlights**

The 2014/15 budget reflects an estimated \$.9 million surplus across all funds. In July, the Board of Education announced its intent to issue not exceed \$19.8 million in working cash bonds. In addition, the Board authorized the construction of an Early Learning Center addition to Holmes Jr. High. Following inter-fund transfers, the surplus represents 100% of the bond proceeds in 2014/15 with approximately 80% of projected expenditures within the Capital Projects Fund.

Revenue budgets reflect a continued period of uncertainty. To establish revenue budgets, the District relies on historical activity as well as the ongoing monitoring of legislative activities. The following are highlights relative for the District's major funding sources:

- Tax revenue assumptions are based on estimates developed as part of the levy adoption process and assume receipt of taxes within the new timeframe established during the 2012/13 fiscal year. Estimates assume the continuation of a decline in Equalized Assessed Valuation,
- representing a 4-year trend of decreasing values. Declining EAV's result in increasing tax rates. Therefore, property owners tend to experience a greater tax burden as their tax rate increases.
- Corporate Personal Property Replacement Taxes (CPPRT) are based on estimates provided by the Illinois Dept. of Revenue (IDOR). IDOR cites an increase of 8.7%. Because of the large industrial base within District 59's boundaries, CPPRT is a major source of revenue.
- The State of Illinois continues to be in fiscal crisis. While the State Board of Education may authorize disbursement of funds, the State Comptroller may not have the cash available to meet those obligations. The Budget assumes receipt of all funds on a pro-rated basis. Legislation has been proposed to revise the propration of the General State Funding formula, although as of this writing no action has taken. Nevertheless, current GSA revenue assumptions assume an 89% proration based on the estimated claim.

- General State Aid's Supplemental Poverty Grant is projected to increase as a result of the growing number of low-income students. The Poverty Grant, a sub-set of General State Aid, accounts for the greatest portion of this funding category.
- Transportation Reimbursement funding is based on a reimbursement system of the prior year's expenditures. This budget assumes receipt of 100% funds during the 2014/15 fiscal year.
- Federal grant funding payment processes moved to an expenditure reimbursement model effective during 2011/12. Federal grant dollars are assumed to be relatively flat, although final allocations won't be known until fall, 2014.

#### Expenditure allocations include the following highlights:

#### **EDUCATIONAL FUND**

- Salary and benefit budgets reflect increases in staffing for 2014/15 fiscal year, particularily newly created coaching positions and elementary assistant principals. The District has focused resources in the areas of leadership development and investing in programs to create distinguished
- Salary budgets also reflect additional hours for Educational Support Personnel whose hours will increase as a result of increasing the number of student instructional time.
- Insurance benefit premiums are relatively flat, thanks to reduced claims activity during the past several years. The District's Employee

  Insurance and Wellness Committee has worked diligently to educate staff on the importance of wellness and consumerism. Overall insurance benefit costs increase only due to increases in staff.
- This budget reflects a significant commitment to professional development, laying the foundation for strategic improvements in the areas of teaching and learning. Improvements in student performance based on the full implementation of the Common Core Standards are supported by continued deployment and understanding of the strong teaching strategies.
- The Technology Plan for 2014/15 reflects the work of the Technology Committee, moving away from laptops to Chromebooks for Junior High
  students and tablets for all grade levels. As most of the expenditures for the technology devices were incurred prior to July 1, the Final Budget was revised from the Tentative Budget to reflect allocations for ongoing replacements. In addition, the District seeks to increase efficiency by
- No allocations were made relative to potential legislative changes to public pension systems.

#### **OPERATIONS AND MAINTENANCE AND CAPITAL PROJECT FUNDS**

- With the Board's authorization to move forward with an Early Learning Center addition to Holmes Jr. High, the budget establishes the creation of the Capital Projects Fund. Allocations within the Capital Projects fund are assumed to account for approximately 80% of the addition's overall estimated cost of \$15 million. Additional allocations within the fund reflect future capital projects to be discussed with the Board in late fall.
- Capital projects funded by the Operations and Maintenance Fund have been designated by a new function code (2530) in an effort to segregate on-going expenditures from on-time expenditures.
- Approved LED lighting improvements and flood control projects had originally been forecasted as part of the 2014/15 budget, but as the work spanned the summer months of 2104, the majority of the expenses were incurred within the 2013/14 fiscal year. The Final Budget was revised from the Tentative Budget to reflect this activity.
- Energy and water costs are anticipated to increase consistent with changes within the markets.

#### TRANSPORTATION FUND

- Transportation salaries show a decrease due to a 1.0 FTE reduction in ESP staff.
- Contracted costs continue to escalate as a result of the demand for specialized services increases, particularily in the areas of homeless and special education transportation mandates.
- · A District mini-bus is scheduled for replacement

#### ILLINOIS MUNICIPAL RETIREMENT/SOCIAL SECURITY FUND

- Budget allocations include changes in staffing and changes in salaries.
- Employer required contributions for IMRF are based on two calendar years, with a 2014 rate of 12.4% and a 2015 rate of 13.3%.

#### **DEBT SERVICE FUND**

- Principal and interest payments are scheduled to decrease in 2014/15. Bonds issued in 2003 and 2009 will be retired in March 2016.
- Principal and interest payments due from the 2014/2015 bond issues will begin during the 2015/16 fiscal year. Overall, projected debt payments will remain the same as 2014/15 so as to not increase the debt service levy.

#### **WORKING CASH FUND**

- This budget reflects \$19.8 million in bond proceeds. The Board of Education expressed its Intent to issue bonds during the 2014/15 fiscal year.
- A \$1.4 million transfer from the Working Cash Fund is budgeted to offset major projects in the Operations and Maintenance and to maintain a strong fund balance to expenditure ratio.
- The Board of Education intends to use Working Cash Funds to offset the costs of constructing an Early Learning Center addition to Holmes Jr.
- High. This budget reflects a transfer from the Working Cash Fund, to the Operations and Maintenance Fund, and then to the Capital Projects Fund.
- As the District has not levied for Working Cash. The only revenue other than bond proceeds to this fund is the interest earned on investments.

#### Revenue

Approximately 85% of the District's revenue is received from **local sources**, inclusive of bond proceeds. The major sources are property taxes, corporate property replacement taxes, and interest earnings. Other local revenue includes such items as donations, student fees and lunch fees. Tuition includes payments from other districts for their students' attendance in District 59 schools for special programming and fee-paying pre-school students.

Property taxes are levied on a calendar basis, but must be budgeted on a fiscal basis. Therefore, property tax revenue includes two different levies. The fall installment assumes approximately 22% of the 2013 levy, and 78% of an estimated 2014 levy. Within the 2011/12 fiscal year, Cook County changed their historical timing of issuing tax bills. As a result, the District received 79% of the 2011 levy, instead of a more typical 54%. The 2014/15 budget assumes this same practice to continue.

Effective with fiscal year 2002/03, the District began budgeting for the potential loss of property tax revenue as a result of property tax refunds. The District believes it is more fiscally responsible to assume the continuation of the revenue losss albeit unpredictable. Because it is after-the-fact and unpredictable, planning and projecting programming expenses becomes more difficult. Based on recent history and current legislative activity, we have assumed a 2.75% loss in anticipated tax distributions, or approximately \$2 million.

Corporate Personal Property Replacement Tax (CPPRT) revenue fluctuates in response to economic conditions. State statute requires the District to budget a portion of this revenue source in the IMR/SS Fund. The remaining amount due the District can be applied to any fund deemed to have the greatest need. With a view on the long-term, CPPRT is spread across the Operations and Maintenance, Educational and IMR/SS Funds. Budget estimates are provided by the Illinois Dept. of Revenue, but are adjusted during the fiscal year.

**Earnings on investments** will be adjusted during the final audit process to reflect market value in accordance with GASB 31 requirements. For budgeting purposes, interest earnings are based on approximately a 2.0% projected annual return. Given the District's healthy fund balances, the School Treasurer is able to maintain longer-term investments, therefore generating some what higher returns.

**State revenue** budget accounts for approximately 11% of total revenue and is designated as restricted (such as grants and categorical funding) or unrestricted (such as general state aid). State funds are dependent on appropriations established by the legislature and the availability of collected funds as released by the State Comptroller. Shortfalls are typically pro-rated across all school districts.

**Federal programs** provide for the final 4% of the District's revenue and are comprised of all categorical funding. The FY15 federal revenue figures are based primarily on estimated grant allocations and participation by low income students in the national school lunch program.

#### **Expenditures**

The expenditures budget is developed with the input budget managers at the schools and the central office department levels. These managers are responsible for allocating for the operations of their respective departments. To reduce the degree of managerial time required by school administrators, some allocations were shifted from site-based responsibility to centralized or departmental budgets. As a result, site-based allocations were reduced from \$1.5 million in 2013/14 to \$1.2 million in 2014/15. The District also pooled existing professional development accounts under the control of the new Associate Superintendent position in an effort to better prioritize and schedule professional development activities.

Contingencies have been added in each fund for the purpose of accommodating any unanticipated or emergency expenditures. Actual expenses will be monitored throughout the year.

Expenditures are traditionally presented in two ways: by object or by function. Object categories consist of salaries, benefits, purchased services, supplies, non-capitalized equipment, capital outlay, etc. Functions include instruction, support services, school administration, and various central services. Long-term capital projects and technology management plans are also provided. Designations are established by the Illinois Program Accounting Manual.

The Administrative Cost Cap (enacted in 1998) addresses a comparison of actual expenditures to the next fiscal year's budget within specific functions. This cost cap is limited to the Educational and Operations & Maintenance funds. The statute requires the percentage increase to be less than 5%. If the Administrative costs exceed 5%, an explanation is required and must be submitted along with the Annual Financial Report (AFR).

#### **Inter-Fund Transfers**

Funds may be transferred between fund in accordance with State Code. A transfer from a fund represents an expense (use) to the fund but is not considered an expense to the District. Likewise, the fund that receives the dollars records it as a revenue (source), but this does not represent a revenue to the District. Transfers can be used to provide additional resources to a fund above and beyond the traditional sources of revenue. The FY15 Budget assumes a transfer of all interest earned in the Debt Service Fund to the Educational Fund, a partial abatement of the Working Cash Fund to the Operations and Maintenance Fund, and an additional transfer from Working Cash to the Operations and Maintenance Fund to the Capital Projects fund.

#### **Fund Balances**

During FY2011/12, the Board of Education adopted its first Fund Balance Policy. The FY14/15 budget falls well within Fund Balance Policy criteria.

#### The District Fund Balance Policy 4.25:

The Superintendent or designee shall maintain fund balances adequate to ensure the District's ability to maintain levels of service and pay its obligations in a prompt manner in spite of unforeseen events or unexpected expenses. The School District seeks to maintain an estimated unassigned (in the Educational Fund) and assigned (in the Operations and Maintenance, Transportation and Working Cash Funds) aggregate ending fund balance based on budgeted revenues and expenditures of no less than the range of 50-60 percent of the annual aggregated budgeted expenditures in the Educational, Operations and Maintenance, Transportation and Working Cash Funds.

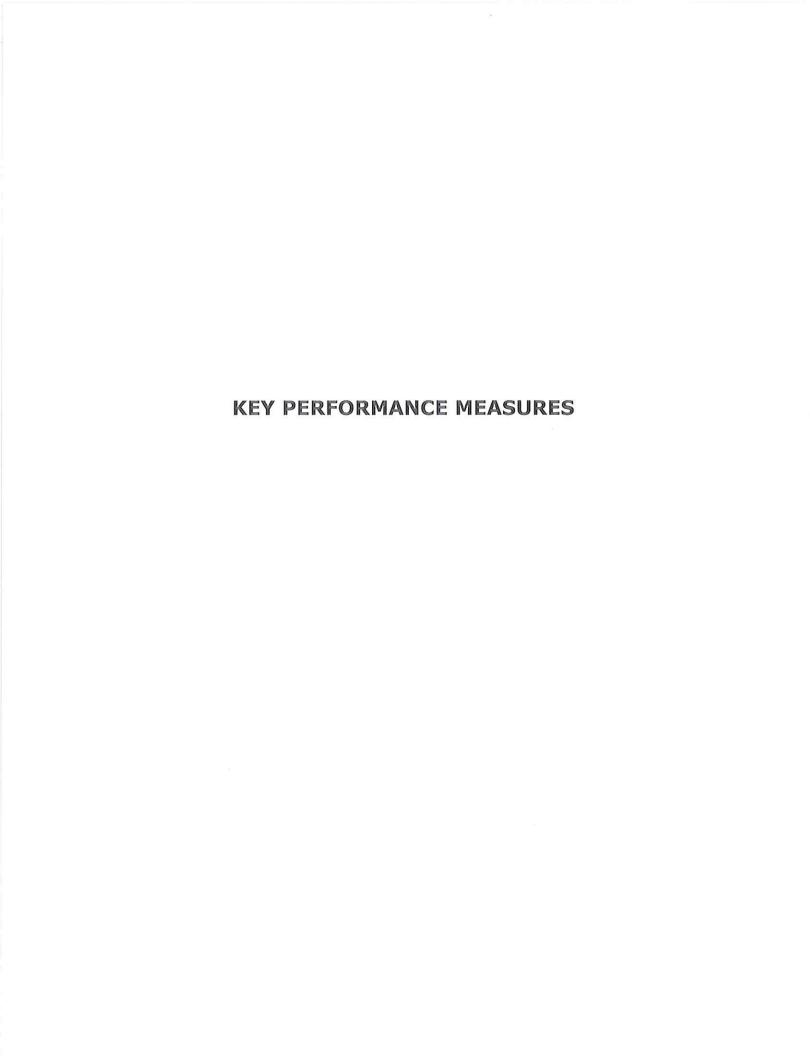

The Board of Education shall direct the Administration to develop a deficit reduction plan when the estimated unassigned (in the Educational Fund) and assigned (in the Operations and Maintenance, Transportation and Working Cash Funds) ending fund balance is less than 60% of the aggregate budgeted expenditures in the Educational, Operations and Maintenance, Transportation and Working Cash Funds, and if the District's financial condition reflects a structural deficit in its major operating funds.

Periodically the Board of Education may by resolution commit a portion of the unrestricted fund balance for a specific purpose. This commitment must be acted upon prior to the close of the fiscal year. The commitment may be subsequently removed by Board resolution. A committed fund balance may not reduce the remaining aggregate estimated unassigned (in the Educational Fund) and assigned (in the Operations and Maintenance, Transportation and Working Cash Funds) ending fund balance to less than 50% of the annual aggregated budgeted expenditures in the Educational, Operations and Maintenance, Transportation and Working Cash Fund.

The Board of Education delegates to the Assistant Superintendent for Business Services the authority to assign fund balance for appropriate projects/purposes.

#### **Fund Balance Designations:**

GASB 54 reporting requirements have established designations within fund balances. District 59's presentation within each fund identifies fund balances as either assigned or unassigned as required by this pronouncement.

- \* School districts must submit a balanced budget or adopt a deficit reduction plan to balance the district's budget within three year.
- \* A balanced budget is determined by comparing the expenditures to the revenues for the aggregated four operating funds (Education, Operations and Maintenance, Transportation and Working Cash).
- \* If the revenues are equal to or greater than the expenditures, the budget is balanced.
- \* If the expenditures are greater than the revenues, the ending fund balance for the aggregate four funds will be divided by three and compared to the aggregate amount of the deficit of the four operating funds.
- \* If the deficit is greater than one-third of the combined ending fund balance, a deficit reduction plan is required.

#### ADMINISTRATIVE COST CAP

With the State's major funding reforms passed in 1998, legislation was enacted with the intent to contain increases in administrative costs.

Specific administrative function costs are limited to 5%, comparin the previous year's actual expenditures to the adopted budget.

The functions designated include the offices of the Superintendent and the Assistant Superintendent of Instruction (2320), the administration of specialized services such as Special Education and Bilingual programs (2330), Direction of Fiscal Services (2510), and centralized internal services, such as purchasing, general equipment repair, warehousing, mail distribution and printing (2570).
