

STANFORD EDUCATION DATA ARCHIVE (SEDA) OVERVIEW

SEDA2023 is a special release of the Stanford Education Data Archive. It is part of a larger partnership with Harvard University's Center for Education Policy Research. This release is designed to provide insight into how school district average achievement in 2023, three years after the onset of the COVID-19 pandemic, compares to achievement in 2022, two years after the onset of the pandemic, and to achievement in 2019, the year prior to the pandemic. Estimates of test score changes between 2019 and 2022 can shed light on the extent of pandemic-related losses, while estimates of test score changes between 2022 and 2023 can provide insight into the extent of academic recovery that occurred once schools returned to normal operations in fall 2022.

Education Recovery Scorecard Data Nation & Illinois MATH Results
